SCREW PILE SYSTEM

HELICAL PILE SUPPORT SYSTEM FOR CONTAINERS

SOLID SECURE ANCHORED

When used to support a container, screw piles guarantee a solid, secure, and built-to-last foundation. Not only are they environmentally friendly, GoliathTech screw piles are also removable and reusable making them the only solution suitable for both permanent and temporary structures.

SOLID ANCHORING PREVENTS MOVEMENT

Our screw piles are installed deep into stable soil to support all structures in any environmental condition or soil type :

- Cohesive and cohesionless soil
- Boggy or waterlogged soil
- Silt, sand or clay

QUALITY ENGINEERING

GOLIATHTECH'S INSTALLATION PROMISE

Our network of certified installers put their vast experience to work to guarantee optimal anchoring of each pile.

Because the quality of an installation is as important as the quality of the piles, all GoliathTech installers have received training at our factory and are certified technicians on the installation of our products.

Installers use mini excavators equipped with our proprietary calibrated torque-reading equipment, which allows them to determine the exact tension and compression values on each site. Their expertise ensures that the screw piles and the supported structure are built to last.
